

Equipment Showcase 2017

The **AGRIMETAL MODEL 400 GREENS ROLLER** features six-inch-diameter drive rollers that provide maximum traction and efficiency in morning dew conditions. A Honda 11-horsepower motor provides years of reliability and ease of maintenance. The #80 chain drive system provides ease of operation with minimum care.

www.agrimetal.com

BANNERMAN'S "EASY LOAD" TRUCK LOADING RAMP (B-TLR) is easy to install with absolutely no welding required! It is powder coated black for durability during the winter, can easily be swapped between ramp and tailgate, has a universal fit for most major trucks, is lightweight constructed that is both tough and durable, and features spring-assisted folding. It can be used to load any and all equipment from large to small. Additionally, it can be used to load ATVs, motorcycles, furniture, appliances and more. New is a two-foot extension kit that is available and extends length of the loading ramp from eight feet to 10 feet.

www.sportsturfmagic.com

NEW DAKOTA CONTROLS on its Turf Tenders material handlers make spreading light, heavy, wet or dry materials easy. Features include a 4.3-inch LCD display, four memory presets, variable belt and spinner speeds, engine start/stop and throttle control, and reference screens for unit settings and adjustments.

www.dakotapeat.com

HUSQVARNA PZ 60 ZERO-TURN provides unparalleled power and efficiency. The mower combines unrivaled power with premium cut quality and superior durability. A powerful 31-horsepower engine and 60-inch cutting width keep professional users working faster and more efficiently. Additionally, cast iron spindles provide top-of-the-line durability. This mower's high-performance, six-inch cutting deck is optimized to give the perfect cut while minimizing grass clumps. The hydro drive system and

low centre of gravity ensure the mower doesn't compromise on efficiency or precision. It also features a practical roll over protection system (ROPS) that can be lowered when mowing in areas with low-hanging branches. For more information on the PZ 60, visit <http://www.husqvarna.com/ca/en/products/zero-turn-mowers/pz-60-522728/>.

DOLMAR OUTDOOR EQUIPMENT BRAND HAS BEEN OWNED BY MAKITA since 1991, allowing the parent company to do well with gas

blowers, gas concrete cutters and gas chainsaws. Its MM4 four-stroke technology is also an industry leader and Makita continues to be innovative on the two-stroke side. The Makita and Dolmar brands have become one under Makita Power Equipment. The integration means there will be a large expansion of the professional chainsaw options for forestry and farm as well as occasional use. These chainsaws have gone to the new red/orange colour, adopted from Dolmar, but get the new Makita nameplate. The two-stroke technology is on all of the Makita chainsaws which feature spring assist easy start low RPM ignition coils which results in 30 per cent less pull resistance, more dependable starts and longer lasting starter assemblies.

PROGRESSIVE TURF EQUIPMENT'S PRO-FLEX 120B is all about added value. Since 1999, it has become the contour/rough finishing mower of choice of leading superintendents and equipment managers. With five independent floating decks and a 10-foot-wide cut, the Pro-Flex 120B easily follows contour changes while producing a uniform quality cut that is demanded by superintendents and members alike. The simplicity and low operating cost of a utility tractor and Pro-Flex 120B combination is a key advantage. Requiring about half the horsepower of a similar width Tier 4 self-contained ride-on mower, the combination of a tractor and a Pro-Flex 120B directly translates to a large savings in fuel cost, year after year, and increased equipment utilization as the tractor can be used for other tasks.

THE CUB CADET PRO Z 900

is a cut above the rest. The new PRO Z line doesn't just include a few updates, but is the company's strongest, most efficient line of mowers yet and is proven by real landscape professionals. After thousands of hours on the job, they provided honest feedback that informed the final design. The result is a line of commercial zero-turn mowers that provide more performance, comfort and durability than ever. Features include up to a 35-horsepower engine and 16cc transmission, allowing for top speeds of up to 14 mph. Best-in-class steering, triple-777-gauge steel deck construction, operator controls, and heavy duty front end construction are also featured.

FOLEY UNITED ACCU-MASTER MODEL 653 features automated in-feed grind cycles for both the spin and relief grind process that separates Foley United from all others. The Accu-Touch 3 control innovations continue making grinding easier than ever. Two minutes to spin grind is all it takes when distinguishing technician time from grind time. Let the Accu-Touch 3 do the work while you do something else. Hands-free relief is the feature that has courses around the world opting for grinders that do more than just spin grind. Foley United's automation of in-feeds and

the patented auto-index provides productivity and choice that other grinders don't. Automatic placement features the Accu-Reel selector and cylinder height stop system that automatically locates the reel for a fast and easy placement to spin and relief grind in one setup.

www.foleyunited.com

FOLEY UNITED ACCU-MASTER

MODEL 633 automatic placement features the Accu-Reel selector and cylinder height stop system that automatically locates the reel for a fast and easy spin and relief grind in one setup. Preset relief angles are easily identified on the relief angle adjuster, which makes it effortless to grind the correct angles and achieve proper clearances for each reel type. Hands-free relief is a key feature that has courses around the world opting for grinders that do more than just spin grind and, when reconditioning your reels to "like new," Foley United's patented Auto-Index relief system makes it easier than ever.

www.foleyunited.com

Two new models were recently introduced to the **TORO REELMASTER FAMILY OF FAIRWAY MOWERS**: the Reelmaster 3555-D with five-inch

(12.7 cm) reels and the Reelmaster 3575-D with seven-inch (17.8 cm) reels. Both deliver a 100-inch (2.5 m) width of cut. The new mowers also feature Toro's new EdgeSeries reels in eight- or 11-blade configurations, and are built on proven and tested Reelmaster platforms. These powerful machines feature Toro's proven Dual Precision Adjustment (DPA) cutting units with EdgeSeries reels that retain their edge longer, and provide a crisp, clean cut. The efficient traction system enhances maneuverability in hilly and wet conditions, while the three-wheel design minimizes turnaround time and wear and tear on turf.

www.toro.com

WOOD BAY TURF TECHNOLOGIES' FDS 9200 TURF DETHATCHER

is ideal for use on sports fields, golf courses, lawns and gardens, parks, landscape construction areas, and horse and race tracks.

On natural turf, it offers high-speed dethatching, helping to prepare turf for overseeding; is a less intrusive alternative to verti-cutting; evenly spreads topdressing sand and/or rubber infill on synthetic playing surfaces; and increases thatch removal for healthier turf with the FDS tines relieving surface compaction to help water, air and fertilizer penetrate the root zone quickly. On artificial surfaces, it revives compacted turf to get the spring back into rubber crumb topdressing in one pass. Its soft spring tines will not pull out fibres like other machines.

BAUMAN DROP SPREADERS deliver uncompromised product quality.

The spreaders prevent waste and property damage with the most accurate de-icing dispensing equipment on the market. New this year, the lineup features sleek sharkskin, grey powder coating. Bauman drop spreaders are available with hydraulic, PTO or electric

drives. This year, the hydraulic models include flow control and hoses while the electric models include a wiring kit. All models feature an agitator that prevents bridging and a unique polymer finger bar with a flexible memory that ensures a consistent crosshatch pattern. Backed by a tradition of quality for more than 40 years and with seven models to choose from, Bauman has the right solution for you.

BILLY GOAT'S ALL NEW NEXT GENERATION HYDRO-DRIVE 18-INCH SOD CUTTER SC181H is built from the ground up upon the most rugged foundation in the industry with a newly designed superstructure frame that features 50 additional pounds of steel and supports a new heavy-duty drive and cut system for the ultimate in smooth cutting, rugged

reliability and simple operation. This unit now features the popular variable speed fingertip control in both forward and reverse, similar to the innovative Billy goat hydro-drive overseeder and brushcutter controls. It is built for consistent feel, simple operation and reliability through the hydro-drive family.

www.billygoat.com

The **KUBOTA RTV-X1100C** now has the K-Connect hitch and compatible implements available. This hitch design allows the RTV-X1100C to run front mount PTO implements such as a 66-inch commercial snow blower (V5296)

and a 66-inch commercial sweeper (V5266). The K-Connect hitch design makes it easy to connect to all available front-mount implements, and the PTO is simply engaged by a single lever. The K-Connect hitch design also has a compatible 78-inch commercial "V" blade (V5295A) and a 78-inch commercial straight blade (V5294A). The complete hitch and PTO components can be easily removed for summer use and to maximize ground clearance.

www.kubota.ca

KUBOTA has expanded its zero-turn mower line up with the addition of the Z400 Series mowers. This series perfectly bridges the gap between the residential Kommander series and the larger commercial Z700 series, both in terms of product features and price. There will be three different models available: Z411KW-48, Z421KW-54, and the Z421KWT-60. Some of the key selling features on the new Z400 Series mowers are the commercial grade Kawasaki FS engines, commercial grade Hydro-Gear transmission, 12V power outlet and smartphone holder, dial cam height of cut adjustment, low profile rear tires and the foot-activated parking break.

www.kubota.ca

KUBOTA'S NEW KX033-4 COMPACT EXCAVATOR is the latest addition to the company's excavator lineup. Fitting into the three to four-tonne market segment, this model will feature Kubota's Tier IV final diesel engine without the need for DOC or DPF along with a choice of a deluxe factory cab with A/C or 4-post ROPS/FOPS canopy. These units will also offer increased auxiliary hydraulic flow and digging depth as well as an angle blade option with dozer blade float. Other features will include four-roller undercarriage, auto downshift travel motors and front auxiliary diverter valve with flow control adjustments that can be made from the in-cab, up-front control panel.

www.kubota.ca

The **REDEXIM CARRIER** is a multi-function power tool that will become the essential all-around instrument for any golf course or sports field. This new machine is designed to carry a variety of hard working implements such as a deep tine aerator, over-seeders, a verti-cutter, sod cutter and more. The Carrier's Vanguard 31 hp engine and three-wheeled hydrostatic drive train make it a powerful, but highly maneuverable machine. With the Redexim Verti-Drain 1513 implement attached to the Carrier's three point lift, it is capable of aerating to a depth of six inches, with either coring or solid tines, and provides the same patented forced heave of all Verti-Drain machines. The Carrier by Redexim is a weapon that every professional turf manager needs in his arsenal.

Equipment Showcase 2017

ECOLAWN APPLICATOR

introduces the New Walker Mower Top Dresser Attachment. This zero-turn Walker Mower attachment is a unique broadcast spreader, and the ECO 75's controls are integrated with the

Walker Mower for comfort, control, and accessibility. The newly designed hopper eliminates material bridging with smooth, steep sides and its live conveyor system and agitator maintain steady material flow for consistent even spreading. Ecolawn's popular dual reverse spinner broadcast system is PTO driven, therefore giving unlimited application thickness control over to the operator's ground speed. This feature is unique to this model.

www.ecolawnapplicator.com

With the newest models of single-stage snow throwers from **REIST INDUSTRIES**, hydraulic drive is now a viable choice for operators of skid steers, smaller telehandlers and compact loaders. Reist manufactures three model ranges of single-stage snow throwers with auger diameters of 16, 24' and 30 inches and widths from 48 inches up to 108 inches. All

are available with a choice of PTO or hydraulic drive. Reist's smallest unit, the 1000 Series, cuts a 48-inch wide swath with a 16-inch auger and is recommended for power units in the range of 15 to 30 HP. The largest model in the 3000 Series runs up to 108 inches wide with a 30-inch auger and is well matched to a prime mover with up to 100 HP. In between is the 2000 Series, featuring a 24-inch auger in standard widths of 48, 60 and 72 inches which suits prime movers in the 30 to 55 HP range.

www.reistindustries.com

STIHL'S FS 91 R is the environmentally friendly successor brushcutter to the FS 90 R that is ready to deliver all of your brushcutting demands. With its larger fuel tank, the FS 91 R is able to run 30 per cent longer than its predecessor. Landscapers will be amazed by the performance and reliability that the FS 91 R has to offer. When you're out in the field all day, you require a starting system that is dependable and ready to go. Well, look no further...the 3-2-1 starting procedure and the stop switch with "standby" mode of the FS 91 R has you covered. It also features an improved filtration system that allows an extended service life.

www.stihl.ca

STIHL'S BR 700 is the ultimate backpack blower for landscapers, municipal workers and stadium cleanup crews who would benefit from the extra power of the BR 700 to effectively gather up leaves, clippings and litter. It is equipped with the advanced Stihl 4-MIXM engine to provide lower fuel consumption and reduced emissions. The ergonomic design of the BR 700 provides improved user comfort with a new tool-less adjustable length blower tube and handle. The switch position on the control handle is conveniently always in the "on" position for a quick and simple start. The features of the BR 700 make it the premium choice for urban and rural areas that require heavy-duty cleanup.

www.stihl.ca

THE STIHL FSA 90 R PROFESSIONAL TRIMMER, part of the company's battery-powered lineup, combines the low maintenance and cost effective benefits of Stihl lithium-ion battery technology with the renowned power of a Stihl. This cordless trimmer is designed for commercial applications, especially for working in noise-sensitive or exhaust emission sensitive areas like school grounds, business districts or hospitals. It also saves users time and money by eliminating the need for gasoline and two-cycle oil. The FSA 90 R starts instantly with the squeeze of a trigger. Its innovative control handle features an Ecospeed throttle set wheel, allowing users to set the most effective throttle speeds for a specific application such as low throttle around delicate plants, and can extend the amount of work done on a single charge.

www.stihl.ca

WALLENSTEIN CR'S COMMERCIAL GRADE CR70D diesel powered seven-inch wood chipper is a popular choice for landscapers, tree service contractors and municipal work crews. At the heart of the CR70D is a large 28-inch cutting disc rotor with four blower paddles and four segmented knives powered by a reliable 1498 CC Kubota V1505 diesel engine, and is also available in a Turbo Diesel (CR70TD). The Wallenstein CR70D has a wide seven-by-12-inch slab-style opening to easily receive awkward branches, reducing trimming. For maximum efficiency, dual active feeding rollers are hydraulically powered and speed controlled by Wallenstein CR's fully programmable Intellifeed electronic control system. Wallenstein CR chippers are made in Canada and backed by a three-year, 2000-hour warranty.

THE 40V MAX* BRUSHLESS CHAINSAW FROM DEWALT is equipped

with a powerful motor that achieves up to 100 cuts per charge using a DCB406 40V MAX 6.0 Ah lithium ion battery and up to 70 cuts using a DCB404 40V MAX 4.0 Ah lithium ion battery,

both on six-by-six-inch pressure-treated pine wood. The unit features a low kickback 16-inch Oregon bar and chain with LubriLink and LubriWell auto-oiling for continuous lubrication and a tool-free tensioning system for quick bar and chain adjustments. With no more of the pull-to-start issues associated with gas-powered equipment, this chainsaw is ideal for use in landscape and construction applications, even in closed spaces.

www.dewalt.ca

THE JOHN DEERE Z960M

ZTRAK MOWER provides professional landscape contractors with a powerful, reliable machine at an affordable price point. Boasting 31.0 HP, the Z960M is available in three deck offerings: 60-inch, 60-inch Mulch On Demand, or 72-inch. Available

with a variety of options, including dump-from-seat Material Collection System capability, three-way adjustable suspension seats and easy-to-use diagnostics, the Z960M is designed to provide an efficient solution to meet the needs of landscape contractors.

www.johndeere.com/commercial

The **NEARY 555SRI** is a unique and powerful grinder that combines all of the latest technology and capability with the ultimate in "Ease of Use" features available. Not only can it be run like any other single dimension grinder for very fast touchup spin grinding tasks, but it also has the capability to properly gauge the reel to remove coning, and add a relief grind fully automatically in the same setup. Innovative engineering combined with feedback from technicians around the world have made this machine a reality. The combination of these features and a competitive price make this machine one that cannot be overlooked.

www.nearytec.com

NEARY TECHNOLOGIES MODEL

181SRI is for courses with limited budgets and an understanding of how grinding affects performance and cut quality of their equipment. The Model 181SRI spin/relief reel grinder is the least expensive, full-featured grinder on the market and, with gauging and "auto index" relief capability, it does everything the more expensive models can do.

If you thought you couldn't afford a grinder that can do it all, think again and call Neary today at 1-800-233-4973 or visit

www.nearytec.com

TRACKLESS VEHICLES LTD. recently introduced its new Series 7 municipal tractor. Over the last 45 years there have been hundreds of changes and improvements that have increased equipment performance, operator comfort and safety features while reducing fuel costs, noise levels and downtime. The MT7 now takes things to a whole new level. To learn more about the new Trackless Series MT7 or arrange to have a demonstration, visit www.tracklessvehicles.com.

WALKER MOWER'S H38I is the most powerful of its proven Model H family of high production mowers. It features 38-horsepower Delphi fuel injection, and impressive torque. This machine is capable of operating all of Walker's biggest decks and attachments with ease. The H38I features a redesigned rear axle for superior handling at high speeds on rough ground. This, along with a four-way adjustable Grammer suspension seat provides personalized comfort, keeping operators productive on long days.

www.walker.com
