

## Equipment Showcase 2010

**WALKER MODEL MB** — The Walker Model MB has been updated for 2010. This simple, clean design uses the same principles as the original Walker Mower, including tilt-up body, zero-turn maneuverability, low centre of gravity and operator comfort in an even more compact configuration. The tractor design is simplified and is more economical for non-catching applications by eliminating the provision for the built-in Grass Handling System (GHS) used on other Walker Mowers. An 18-hp Kohler Command engine option (Model MBK) is now available in addition to the 18-hp Briggs Vanguard engine (Model MBV). Heavier transaxles, a new belt tightener clutch/band brake and a full size garden tractor battery help improve the performance of this exciting tractor. Model MBK also offers a splined PTO coupler. The agile, easy-to-operate Model MB has a ground speed up to 8 MPH. The Model MB uses Walker's gear-driven side discharge and mulching decks up to 56 inches while maintaining the same deck tilt-up feature standard on all Walker decks. Commercial and residential operators alike should find this unique machine to be a strong and efficient performer.

**STIHL FS 70 RC-E GRASS TRIMMER** is a professionally designed, straight-shaft grass trimmer which is ideal for home, farm or professional use. It features a low emission, fuel-efficient engine for longer runtimes between refuelings and up to 28 per cent less fuel consumption. With its low weight of 4.8 kilograms (10.6 pounds), the FS 70 RC-E is perfect for the professional user, trimming all day. The FS 70 RC-E comes standard with the STIHL Easy2Start™ technology, making starting simple, fast and easy for almost anyone. The easy-to-use, low-maintenance TapAction™, 2-line AUTO-CUT® head is also standard. The semi-automatic choke lever provides a smooth start and helps prevent flooding. It has excellent balance and features low vibration, reducing any strain on the user. The FS 70 RC-E's high-durability, forged connecting rod and four-bearing gearbox makes it a reliable choice for all your trimming needs. The STIHL FS 70 RC-E is now available only at your neighbourhood STIHL dealer. Stop by to experience the future of outdoor power equipment today.

**BOBCAT M-SERIES LOADERS** lead industry in design and performance. Since inventing the skid-steer loader more than 50 years ago, Bobcat has constantly improved loader design to make operators more productive and comfortable. New Bobcat® M-Series skid-steer and compact track loaders feature the most significant design changes undertaken by the company. This new design enables the operator to accomplish more work through performance and durability enhancements that provide more power and keep the loader working longer, while increasing operator comfort through improved visibility and a more spacious and comfortable cab. Productivity is the most important feature of any compact loader, which is why Bobcat has increased the performance of the hydraulics on M-Series loaders to enable them to efficiently accomplish more work. The hydraulic systems on M-Series loaders have been engineered for higher standard flow and pressure that give attachments more power to work more quickly.

**GRAVELY PRO-TURN 200** — Introducing the Pro-Turn 200, the most robust and feature rich professional mower available in the market today at a fraction of the cost of competitive machines. Featuring a low maintenance design, increased frame strength, lower centre of gravity, increased rider comfort and the variability to offer a perfect cut each and every time. You will quickly see why this will be the best investment you'll make this year. Other features: cutting widths of 52, 60 and 66 inches, cutting heights ranging from 1.5" to 5.5", ground speed of 13 mph, and the X-Factor Deck.

**EXMARK VANTAGE™** — Vantage is Exmark's first stand-on mower, providing users with comfort, increased productivity and a superior cut. Combined with ergonomically-designed controls including a variable speed bar, Vantage's self-compensating suspension system reduces operator fatigue and increases job quality. The unit's compact size offers operators increased maneuverability, standing tall over the front of the machine provides exceptional visibility to keep a better watch on the deck and any upcoming obstacles, while its superior traction and handling allows users to mow changing landscapes effortlessly. Vantage's durable 1.5" x 3.0" steel frame is available with 48" and 52" decks. Vantage contains the distinct caster position found on all Exmark mowers and the mower utilizes Exmark's UltraCut™ deck to deliver the same cut quality the pros have come to expect from only an Exmark.

**AERWAY** has introduced all new 12' and 15' widths as part of its Groundhog product line. "These are machines for contractors and large municipalities where time is critical. The larger sizes can aerate

up to 10 acres per hour which significantly reduces the average application cost." The units fold vertically for transport and include ballast tanks, pillow block bearings, and the choice of any of the AerWay family of tines including shattertine, sportstine, finetone, or coring tine. They can be fitted with optional smoothing rollers. Go to [www.aerway.com](http://www.aerway.com) or call 1-800-457-8310 for more information.
