

Equipment Showcase 2012

WALLENSTEIN CR60 WOOD CHIPPER — The Wallenstein CR60 commercial wood chipper features new innovations in auto feed controls, improving productivity through its new IntelliFeed electronic feed control system with Rapid Recovery. Traditional auto feeders only have two settings, on and off. The CR60's IntelliFeed continuously monitors the rotor's rpm, slowing the rollers' speed as needed. IntelliFeed continues the chipping at a volume that best matches its rpm. If the CR60's rpm reaches its minimum setting, Wallenstein's Rapid Recovery technology takes over, automatically reversing the log away from the rotor. Rapid Recovery eliminates friction against the rotor, allowing the rotor to increase rpm's faster. The

Wallenstein CR60's chipping capacity is 7" h x 11" w, slab-style opening with standard dual feed rollers. The CR60 uses a 38Hp Kohler engine and is ideal for tree service contractors, landscapers, golf courses and rental fleets.

AGRIMETAL'S FAIRWAY TURBINE BLOWER (Model TB-380 I.C.) is the most powerful turbines on the market, allowing operators to cut their blowing time in half. The blower is powered by a Kohler 38-horsepower engine, has an intelligent control system air nozzle, and gets the performance of a three-point hitch blower without the need of a tractor. See the TB-380 I.C. in action at www.agrimetal.com.

BILLY GOAT'S NEW SELF-PROPELLED OVER SEEDER reduces fatigue associated with pushing and features intuitive forward and reverse operator controls. The unit is 22" wide with an exclusive 11 blade slicing reel that floats along contours of yards increasing seed to soil contact and improving germination rates. The unit comes standard with a 30 lb. seed box that is generously elevated above the turf to eliminate any clogging that may occur from moisture. Billy Goat's exclusive Auto Drop™ system automatically starts and stops seed drop with reel engagement and disengagement conserving seed and prevents "end of run" seed piling. Infinite depth adjustment of the slicer blades promotes longer blade life vs. presets and seed settings are found on board for operator convenience. When it's time to rejuvenate your yard, clean up with Billy Goat, a full line of property cleanup solutions! Go to www.billygoat.com and click on Renovation Line-Up video for more information.

FOLEY ACCU-PRO SPIN/RELIEF GRINDER

The Accu-Pro Spin/Relief Grinder combines "Alignment" with "Auto-Indexing" features with "Spin Grind Only" capability, which takes the grinding task to new levels. You have time to do the manufacturer's recommended grind job on one day, but may be limited to only a touch-up spin grind on another day. That's why one dimensional spin only equipment owners are converting to the patented "hands-free" relief systems of Foley United. The ease and ability to spin and relief grind with one setup provides a better grind than other methods, more precise cut, and less demands on time and effort.

Ideal for cutting and pruning hedges, bushes and shrubs, the powerful **STIHL HS 56 C-E HEDGE TRIMMER** is ideal for professionals. Compared to previous models, the STIHL HS 56 C-E hedge trimmer has improved balance and is significantly lighter, helping reduce operator fatigue. It produces 60 per cent fewer exhaust emissions, lowering the impact on the environment. The reduced-emission engine also delivers improved fuel efficiency for longer run times. Increased blade rigidity, a new blade tooth geometry and double-sided, 24-inch cutter bar provide better trimming performance. A new ergonomic loop handle offers increased comfort for the user. The Easy2Start™ system combined with the single Master Control Lever™, makes starting the STIHL HS 56 C-E quick and easy. A blade tip guard helps prevent damage to the blade, gearbox and objects near the hedge. Ergonomic, fuel efficient and environmentally responsible, the STIHL HS 56 C-E helps professionals power through tough tasks. See our ad on page IFC.
